SUBJECT INDEX FOR VOLUME 62, 1986

A

Absorption
[^{14}C]Monensin balance in bile-fistulated ponies, 173
Acclimatization
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
Acid Phosphatase
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706
Acrosome Reaction
In vivo capacitation and acrosome reaction of bovine sperm in estrous and diestrous cows, 1029
Adipose Tissues
Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissues, 363
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584
Stimulation of lipogenesis in bovine adipose tissue by insulin and insulin-like growth factor, 357
Variables in estimation of adipocyte size and number with a particle counter, 980
Aflatoxins
Feedlot performance and tissue residues of cattle consuming diets containing aflatoxins, 691
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Age
Winter grazing activity and forage intake of range cows in the Northern Great Plains, 1240
Aggressive Behavior
Agonistic behavior in food animals: Review of research and techniques, 1130
Inability to predict sexual and aggressive behaviors by plasma concentrations of testosterone and luteinizing hormone in Hereford bulls, 613
Measuring social behavior: Social dominance, 1120
Alfalfa
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Aluminum
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396
Amino Acids
Effect of intake and forage level on ruminal turnover rates, bacterial protein synthesis and duodenal amino acid flows in sheep, 216
Effects of rumen-protected methionine and lysine on ruminant performance and nutrient metabolism, 1101
The effect of heat treatment of whole cottonseed on site and extent of protein digestion in dairy cows, 1423
Threonine requirement of pigs weighing 5 to 15 kg, 1417
Tryptophan requirement of growing swine as determined by the oxidation of an indicator amino acid, 660
Ammonia
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Digestion and utilization of ammoniated grass-legume silage, 235
Postprandial trends in estimated rumen digesta polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789
Protein degradation by rumen microbes of heat-treated whole cottonseed, 1732
Anaerobiosis
Ruminal evacuation's effect on microbial activity and ruminal function, 783
Androgens
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Angus
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
I. Measurement of selection applied, 54
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
II. Evaluation of response, 66
Animal Husbandry
From husbandry to science: A highly significant facet of our livestock heritage, 1742
Animal Welfare
Assessment of comfort and well-being in farm animals, 1769
Behavioral, physiological and functional aspects of stereotyped behavior: A review and a reinterpretation, 1776
Antibiotics
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects on dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
The effects of a dietary antimicrobial on the biological half-life of chenodeoxycholic acid and plasma bile acid concentration patterns in the young pig, 997
Artificial Insemination
Influence of body weight and number of inseminations on fertility of progestogen-treated ewe lambs raised in controlled environments, 1058

B

Bacteria
Postprandial trends in estimated rumen digesta

polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789
Bacterial Protein
Effect of intake on forage level on ruminal turnover rates, bacterial protein synthesis and duodenal amino acid flows in sheep, 216
Barbados
Ovulation rate and litter size of Barbados, Targhee and crossbred ewes, 905
Behavior
Agonistic behavior in food animals: Review of research and techniques, 1130
Assessment of comfort and well-being in farm animals, 1769
Behavioral, physiological and functional aspects of stereotyped behavior: A review and a re-interpretation, 1776
Effects of zeranol implantation and late castration on sexual, agonistic and handling behavior in male feedlot cattle, 1224
Electro-immobilization versus mechanical restraint in an avoid-avoid choice test for ewes, 1469
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Inability to predict sexual and aggressive behaviors by plasma concentrations of testosterone and luteinizing hormone in Hereford bulls, 613
Maternal behavior of beef cows at parturition, 42
Measuring social behavior: Social dominance, 1120
The effect of meal intervals and weaning on feed intake of early weaned pigs, 1233
Winter grazing activity and forage intake of range cows in the Northern Great Plains, 1240
Best Linear Unbiased Predictor
Including pedigree relationships in beef sire evaluation, 1563
Bile
[^{14}C]Monensin balance in bile-fistulated ponies, 173
Bile Acids
The effects of a dietary antimicrobial on the biological half-life of chenodeoxycholic acid and plasma bile acid concentration patterns in the young pig, 997
Binding Site
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Biotechnology
Recombinant DNA, gene transfer and the future of animal agriculture, 1759
Birth Weight
Birth weight, dystocia and calf mortality in some New Zealand beef breeding herds, 327
Maternal behavior of beef cows at parturition, 42
Blood
Effect of diet and exercise on performance, carcass traits and plasma components of growing-finishing barrows, 665
Estimation of repeatability of blood constituents in gestating beef cattle on protein- and energy-restricted diets, 1049
Fetal growth of beef calves.
I. Effect of prepartum dietary crude protein on birth weight, blood metabolites and steroid hormone concentrations, 1363
Relationships among serum characteristics, performance and carcass traits in growing pigs, 1675
Boar Taint
An immunological approach for prevention of boar odor in pork, 1279
Steroid hormone pathways in the pig, with special emphasis on boar odor: A review, 632
Body Composition
Development of a dynamic model of beef cattle growth and composition, 86
Efficiency of growth in mice with a major gene for rapid postweaning gain, 77
Growth, development and body composition in three genetic stocks of swine, 968
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
Body Condition
Body condition of sows across parities and relationship to reproductive performance, 1187
Effect of varying levels of postpartum nutrition and body condition at calving on subsequent reproductive performance in beef cattle, 300
Body Fat
Characterization of cattle of a five-breed diallel:
VI. Fat deposition patterns of serially slaughtered bulls, 1259
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Mass selection in a pig population: Experimental design and responses to direct selection for rapid growth and minimum fat, 1492
Mass selection in a pig population: Realized heritabilities, 1509
Body Measurements
Development of a dynamic model of beef cattle growth and composition, 86
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
II. Absolute growth and associated changes in carcass composition, 121
Effects on feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
III. Partioning of separable carcass fat, 132
Body Weight
Birth weight, dystocia and calf mortality in some New Zealand beef breeding herds, 327
Influence of body weight and number of inseminations on fertility of progestogen-treated ewe lambs raised in controlled environments, 1058
Response of body weight and clearance and secre-

tion rates of growth hormone to photoperiod in Holstein heifers, 1273
Bones
A radiographic characterization of toe length disparity and its relation to nutrition and structural unsoundness in boars, barrows and sows, 1172
Influence of level of feeding and nutrient content of the concentrate on growth and development of yearling horses, 290
Breeds
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
Effects of anabolic implants and breed group on carcass traits and palatability characteristics of bullock beef, 399
Preweaning breed-of-sire comparisons involving the Senepol breed of cattle, 1247
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555
Sire effect and repeatability of beef cow productivity, 1255

C

Calcium
Biological characteristics for assessing low phosphorus intake in finishing swine, 163
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396
Cannulation
Ileal cannulation in baby pigs with a simple T-cannula, 407
Capacitation
In vivo capacitation and acrosome reaction of bovine sperm in estrous and diestrous cows, 1029
Carbadox
The effects of a dietary antimicrobial on the biological half-life of chenodeoxycholic acid and plasma bile acid concentration patterns in the young pig, 997
Carbohydrates
Postprandial trends in estimated rumen digesta polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789
Carcasses
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
Effect of cimaterol (CL 263,780) as a repartitioning agent in the diet for finishing pigs, 21
Effect of diet and exercise on performance, carcass traits and plasma components of growing-finishing barrows, 665
Effects of anabolic implants and breed group on carcass traits and palatability characteristics of bullock beef, 399
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Effects of endogenous and exogenous growth-promoting compounds on carcass composition, meat quality and meat nutritional value, 1441
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
II. Absolute growth and associated changes in carcass composition, 121
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
III. Partitioning of separable carcass fat, 132
Genetic correlation between boars, barrows and gilts for various carcass traits, 618
Growth, carcass and palatability traits of intact males and steers implanted with zeranol or estradiol early and throughout life, 625
Heterosis among closed lines of Hereford cattle.
III. Postweaning growth and carcass traits in steers, 950
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Implanting young bulls with zeranol from birth to four slaughter ages:
II. Carcass quality, palatability and muscle-collagen characteristics, 388
Mass selection in a pig population: Correlated changes in carcass merit, 1546
Relationships among serum characteristics, performance and carcass traits in growing pigs, 1675
The effects of two shipping treatments on the carcass characteristics of bulls implanted with zeranol and unimplanted steers, 1602
Using postmortem technology to complement livestock production practices, 1449
Video image analysis prediction of total kilograms and percent primal lean and fat yield of beef carcasses, 1609
Castration
Effects of zeranol implantation and late castration on sexual, agonistic and handling behavior in male feedlot cattle, 1224
Cations
The effect of hig. dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
Cattle
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
Administration of monensin in self-fed (salt limiting) dry supplements or on an alternate-day feeding schedule, 593
Anovulation in postpartum suckled beef cows.
I. Associations among size and numbers of ovarian follicles, uterine involution, and hormones in serum and follicular fluid, 734
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells,

and concentrations of steroids in various sized ovarian follicles, 742
Anterior pituitary concentrations of gonadotropins, GnRH-receptors and ovarian characteristics following early weaning in beef cows, 717
Birth weight, dystocia and calf mortality in some New Zealand beef breeding herds, 327
Characterization of cattle of a five-breed diallel:
VI. Fat deposition patterns of serially slaughtered bulls, 1259
Comparison of two- and three-way rotational crossing, beef X beef and beef X Brown Swiss composite breed production, 344
Comparisons among two-breed cross cow groups.
III. Economic evaluation of calf production, 1481
Development of a dynamic model of beef cattle growth and composition, 86
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
I. Measurement of selection applied, 54
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
II. Evaluation of response, 66
Economic effects of alternative beef cow size and milking potential in cow-calf operations, 1154
Effect of FSH treatment on LH and FSH receptors in chronic cystic-ovarian-diseased dairy cows, 1063
Effect of naloxone on serum luteinizing hormone, cortisol and prolactin concentrations in anestrous beef cows, 1340
Effects of dietary additives on B-vitamin production and absorption in steers, 484
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
II. Absolute growth and associated changes in carcass composition, 121
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
III. Partitioning of separable carcass fat, 132
Effects of forage particle size, level of feed intake and supplemental protein degradability on microbial protein synthesis and site of nutrient digestion in steers, 1081
Effects of grain source and concentrate level on B-vitamin production and absorption in steers, 473
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Effects of pulsatile injection of GnRH into 6- to 14-wk-old Holstein bulls, 1332
Effects of restriction of dietary energy intake during the prepubertal period on secretion of luteinizing hormone and responsiveness of the pituitary to luteinizing hormone-releasing hormone in heifers, 1641
Effects of slaframine on ruminant digestive function: Resting salivary flow and composition in cattle, 1404
Effects of zeranol implantation and late castration on sexual, agonistic and handling behavior in male feedlot cattle, 1224
Elevation of serum testosterone during chronic LHRH agonist treatment in the bull, 199
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072
Estimation of repeatability of blood constituents in gestating beef cattle on protein- and energy-restricted diets, 1049
Evaluation of a model of beef cattle growth and composition, 98
Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissue, 363
Factors affecting the relationship between calving interval of cows and weaning weights of calves, 1194
Fate and residues of [4-^{14}C]estradiol-17β after intramuscular injection into Holstein steer calves, 681
Feedlot performance and tissue residues of cattle consuming diets containing aflatoxins, 691
Fetal growth of beef calves.
I. Effect of prepartum dietary crude protein on birth weight, blood metabolites and steroid hormone concentrations, 1363
Fetal growth of beef calves.
II. Effect of sire on prenatal development of the calf and related placental characteristics, 1375
Growth, carcass and palatability traits of intact males and steers implanted with zeranol or estradiol early and throughout life, 625
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
Heterosis among closed lines of Hereford cattle.
III. Postweaning growth and carcass traits in steers, 950
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Implanting young bulls with zeranol from birth to four slaughter ages:
II. Carcass quality, palatability and muscle-collagen characteristics, 388

In vivo capacitation and acrosome reaction of bovine sperm in estrous and diestrous cows, 1029
Inability to predict sexual and aggressive behaviors by plasma concentrations of testosterone and luteinizing hormone in Hereford bulls, 613
Including pedigree relationships in beef sire evaluation, 1563
Influence of copper supplementation on blood and liver copper in cattle fed tall fescue or quackgrass, 263
Influence of dietary crude protein on peanut skin digestibility and utilization by feedlot steers, 887
Inositol and hepatic lipidosis.
I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693
Insulin binding to bovine mammary membranes: Comparison of microsomes versus smooth membranes, 179
Lasalocid toxicity in cattle: Acute clinicopathological changes, 1308
Low-quality roughages for steers grazing wheat pasture.
II. Effect of wheat forage intake and utilization, 1113
Management of transit-stress syndrome in cattle: Nutritional and environmental effects, 555
Maternal behavior of beef cows at parturition, 42
Neonatal calf serum immunoregulation of lymphocyte blastogenic responses, 759
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
Ovarian follicular growth, function and turnover in cattle: A review, 428
Prevalence and effects of intramammary infection in beef cows, 16
Preweaning breed-of-sire comparisons involving the Senepol breed of cattle, 1247
Relationships among concentrations of four opioid neuropeptides and luteinizing hormone-releasing hormone in neural tissues of beef cows following early weaning, 723
Response of body weight and clearance and secretion rates of growth hormone to photoperiod in Holstein heifers, 1273
Response of fall-born calves to progesterone-estradiol benzoate implants and reimplants, 37
Ruminal and post-ruminal utilization of nitrogen and starch from sorghum grain-, corn- and barley-based diets by beef steers, 521
Scrotal circumference in yearling Hereford bulls: Adjustment factors, heritabilities and genetic, environmental and phenotypic relationships with growth traits, 958
Selection in Hereford cattle.
I. Selection intensity, generation interval and indexes in retrospect, 927
Selection in Hereford cattle.
II. Expected and realized response, 937
Temporal relationship of the pulsatile fluctuation of luteinizing hormone and progesterone in the bovine: A time series cross-correlation analysis, 191
The effect of a preassembly implant and post-transit diet on the health performance and metabolic profile of feeder calves, 27
The effect of environmental temperature on concentrations of thyroxine and triiodothyronine after thyrotropin releasing hormone in steers, 1346
The effect of high dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
The effect of pre-fast diet and transport on nitrogen metabolism of calves, 1719
The effects of two shipping treatments on the carcass characteristics of bulls implanted with zeranol and unimplanted steers, 1602
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875
Twenty-four-hour growth hormone profiles in Angus steers, 1267
Use of chlortetracycline for treatment of new feedlot cattle, 1215
Using net energy for gain and maintenance in a quadratic equation to calculate beef cattle diets, 1095
Winter grazing activity and forage intake of range cows in the Northern Great Plains, 1240
Cellulose
Influence of lignin on digestibility of forage cell wall material, 1703
Ceruloplasmin
Influence of copper supplementation on blood and liver copper in cattle fed tall fescue or quackgrass, 263
Chemical Treatment
In vitro anaerobic fermentation of alkali-treated corn stover by rumen microbes, 822
Chickens
Skeletal muscle protein turnover in broiler and layer chicks, 1576
Chlortetracycline
Effects of dietary additives on B-vitamin production and absorption in steers, 484
Use of chlortetracycline for treatment of new feedlot cattle, 1215
Cholesterol
Inositol and hepatic lipidosis.
I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
The effects of a dietary antimicrobial on the biological half-life of chenodeoxycholic acid and plasma bile acid concentration patterns in the young pig, 997
Cimaterol
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Cold Resistance
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Collagen
Implanting young bulls with zeranol from birth

to four slaughter ages:
II. Carcass quality, palatability and muscle-collagen characteristics, 388
Confinement
Effect of monensin on the performance of cattle on pasture or fed harvested forages in confinement, 583
The effect of confinement on days to puberty in gilts, 1203
Consumer Preferences
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
Using restructuring technology to increase red meat value, 1458
Copper
Influence of copper supplementation on blood and liver copper in cattle fed tall fescue or quackgrass, 263
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706
Corn Oil
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Corn Stover
In vitro anaerobic fermentation of alkali-treated corn stover by rumen microbes, 822
Corpus Luteum
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the estrous cycle at treatment, 422
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Correlated Responses
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
II. Evaluation of response, 66
Mass selection in a pig population: Correlated changes in carcass merit, 1546
Cortisol
Effect of naloxone on serum luteinizing hormone, cortisol and prolactin concentrations in anestrous beef cows, 1340
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Neonatal calf serum immunoregulation of lymphocyte blastogenic responses, 759
Cottonseed
Protein degradation by rumen microbes of heat-treated whole cottonseed, 1732
The effect of heat treatment of whole cottonseed on site and extent of protein digestion in dairy cows, 1423
Crossbreeding
Characterization of cattle of a five-breed diallel:
VI. Fat deposition patterns of serially slaughtered bulls, 1259
Comparison of two- and three-way rotational crossing, beef × beef and beef × Brown Swiss composite breed production, 344
Comparisons among two-breed cross cow groups.
III. Economic evaluation of calf production, 1481
Heterosis levels from matings utilizing crossbred sires, 47
Preweaning breed-of-sire comparisons involving the Senepol breed of cattle, 1247
Reciprocal cross effects on growth hormone and prolactin secretion in cattle: Influence of genotype and maternal environment, 1660
Culture
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584

D

Detoxification
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072
Diabetes
Effect of streptozotocin-induced diabetes in primiparous swine on subsequent reproductive performance, 1005
Diarrhea
Body weight, total body water and hematocrit in diarrheic piglets, 307
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Diets
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Administration of monensin in self-fed (salt limiting) dry supplements or on an alternate-day feeding schedule, 593
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155
Effect of cimaterol (CL 263,780) as a repartitioning agent in the diet for finishing pigs, 21
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
Effects of age, weaning and diet on digestive enzyme levels in the piglet, 1298
Effects of grain source and concentrate level on B-vitamin production and absorption in steers, 473
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072
Evaluation of a model of beef cattle growth and composition, 98
Influence of animal diet and carcass electrical stimulation on the quality of meat from youthful ram lambs, 139
Low-quality roughages for steers grazing wheat pasture.
II. Effect of wheat forage intake and utilization, 1113
N^{τ}-methylhistidine—Feed and duodenal content and ruminal degradation, 1713
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
Nutritive value of high- and low-tannin grain sorghums harvested and stored in the high-moisture state for growing-finishing swine,

1290
Ruminal and post-ruminal utilization of nitrogen and starch from sorghum grain-, corn- and barley-based diets by beef steers, 521
The effects of diet and remating interval after parturition on the reproductive performance of the commercial doe rabbit, 1624
Using net energy for gain and maintenance in a quadratic equation to calculate beef cattle diets, 1095
Digestibility
Digestibility and feeding value of peanut hulls for swine, 412
Digestion and utilization of ammoniated grass-legume silage, 235
Dynamics of digestion in cattle, sheep, goats and deer, 208
Effect of supplemental sodium bicarbonate on nutrient digestibilities and rumen pH measured continuously, 226
In vitro anaerobic fermentation of alkali-treated corn stover by rumen microbes, 822
Influence of dietary crude protein on peanut skin digestibility and utilization by feedlot steers, 887
Influence of lignin on digestibility of forage cell wall material, 1703
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
Digestion
An update of a dynamic model of ruminant digestion, 1412
Dynamics of digestion in cattle, sheep, goats and deer, 208
Effects of age, weaning and diet on digestive enzyme levels in the piglet, 1298
Effects of diet concentrate level and sodium bicarbonate on site and extent of forage fiber digestion in the gastrointestinal tract of wethers, 1388
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
Effects of forage particle size, level of feed intake and supplemental protein degradability on microbial protein synthesis and site of nutrient digestion in steers, 1081
Ruminal and post-ruminal utilization of nitrogen and starch from sorghum grain-, corn- and barley-based diets by beef steers, 521
Ruminal evacuation's effect on microbial activity and ruminal function, 783
The effect of heat treatment of whole cottonseed on site and extent of protein digestion in dairy cows, 1423
Dystocia
Birth weight, dystocia and calf mortality in some New Zealand beef breeding herds, 327
Fetal growth of beef calves.
I. Effect of prepartum dietary crude protein on birth weight, blood metabolites and steroid hormone concentrations, 1363
Fetal growth of beef calves.
II. Effect of sire on prenatal development of the calf and related placental characteristics, 1375
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875

E

Economics
A survey of productivity and its component interrelationships in Canadian swine herds, 576
Comparisons among two-breed cross cow groups.
III. Economic evaluation of calf production, 1481
Economic effects of alternative beef cow size and milking potential in cow-calf operations, 1154
Efficiency
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
Economic effects of alternative beef cow size and milking potential in cow-calf operations, 1154
Excess supplemental choline for swine, 992
Electrical Stimulation
Influence of animal diet and carcass electrical stimulation on the quality of meat from youthful ram lambs, 139
Responses of bovine muscle to restraint and electrical stimulation, 147
Using postmortem technology to complement livestock production practices, 1449
Energy
Body temperature in beef cattle: Its control and relevance to production in the tropics, 531
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155
Effect of diet and exercise on performance, carcass traits and plasma components of growing-finishing barrows, 665
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Efficiency of growth in mice with a major gene for rapid postweaning gain, 77
Evaluation of a model of beef cattle growth and composition, 98
Influence of level of feeding and nutrient content of the concentrate on growth and development of yearling horses, 290
The effects of diet and remating interval after parturition on the reproductive performance of the commercial doe rabbit, 1624
Using net energy for gain and maintenance in a quadratic equation to calculate beef cattle diets, 1095
Environment
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Management of transit-stress syndrome in cattle: Nutritional and environmental effects, 555
Enzymes
Effects of age, weaning and diet on digestive enzyme levels in the piglet, 1298
Epinephrine

Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissue, 363
Estrogens
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Anovulation in postpartum suckled beef cows. I. Associations among size and numbers of ovarian follicles, uterine involution, and hormones in serum and follicular fluid, 734
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Fate and residues of [4-^{14}C]estradiol-17β after intramuscular injection into Holstein steer calves, 681
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Pulsatile or continuous infusion of luteinizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
Response of fall-born calves to progesterone-estradiol benzoate implants and reimplants, 37
Estrous Cycle
Effect of boar presence before and after weaning on estrus and ovulation in sows, 9
Effect of varying levels of postpartum nutrition and body condition at calving on subsequent reproductive performance in beef cattle, 300
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
Serum concentrations of prolactin, thyroxine and triiodothyronine relative to season and the estrous cycle in the mare, 1012
Temporal relationship of the pulsatile fluctuation of luteinizing hormone and progesterone in the bovine: A time series cross-correlation analysis, 191
The effect of duration of boar exposure on the frequency of gilts reaching first estrus, 1210
Excretion
Fate and residues of [4-^{14}C]estradiol-17β after intramuscular injection into Holstein steer calves, 681
[^{14}C]Monensin balance in bile-fistulated ponies, 173
Exercise
Effect of controlled exercise on libido in 2-yr-old stallions, 1220
Effect of diet and exercise on performance, carcass traits and plasma components of growing-finishing barrows, 665

F

Fasting
Effect of feed and(or) water deprivation prior to weaning on reproductive performance of sows: A cooperative study, 1
Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissue, 363
The effect of pre-fast diet and transport on nitrogen metabolism of calves, 1719
Fat Consumption
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Fatty Acids
Inositol and hepatic lipidosis. I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
Postprandial trends in estimated rumen digesta polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789
The effect of meal intervals and weaning on feed intake of early weaned pigs, 1233
Feed Conversion
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
Enhanced nitrogen retention in yearling horses supplemented with yeast culture, 1635
Feed Intake
Effect of intake and forage level on ruminal turnover rates, bacterial protein sysnthesis and duodenal amino acid flows in sheep, 216
Low-quality roughages for steers grazing wheat pasture. II. Effect of wheat forage intake and utilization, 1113
The effect of meal intervals and weaning on feed intake of early weaned pigs, 1233
Fermentation
In vitro anaerobic fermentation of alkali-treated corn stover by rumen microbes, 822
Fertilizers
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813
Fescue
Influence of copper supplementation on blood and liver copper in cattle fed tall fescue or quackgrass, 263
Fetus
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706
Finnish Landrace
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555
Fish Meal
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Fluids
Susceptibility to stress, postmortem muscle metabolism and meat quality of pigs after modifica-

tion of the fluid volume of the vascular and extravascular spaces, 646
Follicle Stimulating Hormone
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Clearance rate of luteinizing hormone and follicle stimulating hormone from peripheral circulation in the pig, 1649
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the estrous cycle at treatment, 422
Effect of FSH treatment on LH and FSH receptors in chronic cystic-ovarian-diseased dairy cows, 1063
Pulsatile or continuous infusion of luteinizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
Follicles
Anovulation in postpartum suckled beef cows.
I. Associations among size and numbers of ovarian follicles, uterine involution, and hormones in serum and follicular fluid, 734
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells, and concentrations of steroids in various sized ovarian follicles, 742
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Ovarian follicular growth, function and turnover in cattle: A review, 428
Forages
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Effect of intake and forage level on ruminal turnover rates, bacterial protein synthesis and duodenal amino acid flows in sheep, 216
Effect of monensin on the performance of cattle on pasture or fed harvested forages in confinement, 583
Effects of diet concentrate level and sodium bicarbonate on site and extent of forage fiber digestion in the gastrointestinal tract of wethers, 1388
Influence of lignin on digestibility of forage cell wall material, 1703
Low-quality roughages for steers grazing wheat pasture.
II. Effect of wheat forage intake and utilization, 1113
N^{τ}-methylhistidine—Feed and duodenal content and ruminal degradation, 1713
Winter grazing activity and forage intake of range cows in the Northern Great Plains, 1240
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813
Frame Size
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
II. Absolute growth and associated changes in carcass composition, 121
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
III. Partitioning of separable carcass fat, 132
Evaluation of a model of beef cattle growth and composition, 98

G

Generation Interval
Selection in Hereford cattle.
I. Selection intensity, generation inteerval and indexes in retrospect, 927
Genetic Parameters
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
Genetic correlation between boars, barrows and gilts for various carcass traits, 618
Mass selection in a pig population: Realized heritabilities, 1509
Selection in Hereford cattle.
I. Selection intensity, generation interval and indexes in retrospect, 927
Selection in Hereford cattle.
II. Expected and realized response, 937
Genetics
Efficiency of growth in mice with a major gene for rapid postweaning gain, 77
Recombinant DNA, gene transfer and the future of animal agriculture, 1759
Goats
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Gonadotropin Releasing Hormone
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Clearance rate of luteinizing hormone and follicle stimulating hormone from peripheral circula-

tion in the pig, 1649
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Effects of pulsatile injection of GnRH into 6- to 14-wk-old Holstein bulls, 1332
Gonadotropins
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells, and concentrations of steroids in various sized ovarian follicles, 742
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Ovarian follicular growth, function and turnover in cattle: A review, 428
Grass Tetany
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396
Growth
Comparison of two- and three-way rotational crossing, beef X beef and beef X Brown Swiss composite breed production, 344
Development of a dynamic model of beef cattle growth and composition, 86
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Effects of endogenous and exogenous growth-promoting compounds on carcass composition, meat quality and meat nutritional value, 1441
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
II. Absolute growth and associated changes in carcass composition, 121
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
III. Partitioning of separable carcass fat, 132
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Efficiency of growth in mice with a major gene for rapid postweaning gain, 77
Evaluation of a model of beef cattle growth and composition, 98
Evaluation of growth, carcass traits and reproductive organs of young boars in response to zeranol implantation, 1164
Excess supplemental choline for swine, 992
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895
Growth, carcass and palatability traits of intact males and steers implanted with zeranol or estradiol early and throughout life, 625
Growth, development and body composition in three genetic stocks of swine, 968
Impact of niacin and length of incubation on protein synthesis, soluble to total protein ratio and fermentative activity of ruminal microorganisms, 244
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Mass selection in a pig population: Experimental design and responses to direct selection for rapid growth and minimum fat, 1492
Mass selection in a pig population: Realized heritabilities, 1509
Reciprocal cross effects on growth hormone and prolactin secretion in cattle: Influence of genotype and maternal environment, 1660
Response of fall-born calves to progesterone-estradiol benzoate implants and reimplants, 37
Scrotal circumference in yearling Hereford bulls: Adjustment factors, heritabilities and genetic, environmental and phenotypic relationships with growth traits, 958
Skeletal muscle protein turnover in broiler and layer chicks, 1576
Stimulation of lipogenesis in bovine adipose tissue by insulin and insulin-like growth factor, 357
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875
Using postmortem technology to complement livestock production practices, 1449

H

Handling
Electro-immobilization versus mechanical restraint in an avoid-avoid choice test for ewes, 1469
Heat Production
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
Heat Treatment
Protein degradation by rumen microbes of heat-treated whole cottonseed, 1732
The effect of heat treatment of whole cottonseed on site and extent of protein digestion in dairy cows, 1423
Hematocrit
Body weight, total body water and hematocrit in diarrheic piglets, 307
Hemicellulose
Influence of lignin on digestibility of forage cell

wall material, 1703
Hereford
Heterosis among closed lines of Hereford cattle.
III. Postweaning growth and carcass traits in steers, 950
Selection in Hereford cattle.
I. Selection intensity, generation interval and indexes in retrospect, 927
Selection in Hereford cattle.
II. Expected and realized response, 937
Heritage
From husbandry to science: A highly significant facet of our livestock heritage, 1742
Heterosis
Comparison of two- and three-way rotational crossing, beef × beef and beef × Brown Swiss composite breed production, 344
Heterosis among closed lines of Hereford cattle.
III. Postweaning growth and carcass traits in steers, 950
Heterosis levels from matings utilizing crossbred sires, 47
Ovulation rate and litter size of Barbados, Targhee and crossbred ewes, 905
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
History
From husbandry to science: A highly significant facet of our livestock heritage, 1742
Horses
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Effect of controlled exercise on libido in 2-yr-old stallions, 1220
Enhanced nitrogen retention in yearling horses supplemented with yeast culture, 1635
Influence of level of feeding and nutrient content of the concentrate on growth and development of yearling horses, 290
[^{14}C] Monensin balance in bile-fistulated ponies, 173
Hypothalamus
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021

I

IBR/IPV Virus
Use of chlortetracycline for treatment of new feedlot cattle, 1215
Ileum
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
Ileal cannulation in baby pigs with a simple T-cannula, 407
Immobilization
Electro-immobilization versus mechanical restraint in an avoid-avoid choice test for ewes, 1469
Immunology
An immunological approach for prevention of boar odor in pork, 1279
Intrauterine infusion of killed semen to increase litter size in gilts, 187
Indexes
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Mass selection in a pig population: Experimental design and responses to direct selection for rapid growth and minimum fat, 1492
Mass selection in a pig population: Realized heritabilities, 1509
Selection in Hereford cattle.
I. Selection intensity, generation interval and indexes in retrospect, 927
Infection
Prevalence and effects of intramammary infection in beef cows, 16
Injuries
Assessment of comfort and well-being in farm animals, 1769
Insulin
Effects of obesity on insulin and glucose metabolism in cyclic heifers, 772
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693
Insulin binding to bovine mammary membranes: Comparison of microsomes versus smooth membranes, 179
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584
Stimulation of lipogenesis in bovine adipose tissue by insulin and insulin-like growth factor, 357
Intensive Livestock Farming
Potential nutritional strategies for intensively managed cattle during thermal stress, 543
Ionophores
The effect of high dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
Iron
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706

K

Kinetics
Vanadium metabolism in sheep.
III. Influence of dietary vanadium on kinetics of ^{48}V administered orally or intravenously and comparison of compartmental and graphic models, 804

L

Lactation
Economic effects of alternative beef cow size

and milking potential in cow-calf operations, 1154
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Lasalocid
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Lasalocid toxicity in cattle: Acute clinicopathological changes, 1308
The effect of high dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
Lignin
Influence of lignin on digestibility of forage cell wall material, 1703
Line Crosses
Heterosis among closed lines of Hereford cattle. III. Postweaning growth and carcass traits in steers, 950
Lipids
Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissue, 363
Inositol and hepatic lipidosis.
I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584
Stimulation of lipogenesis in bovine adipose tissue by insulin and insulin-like growth factor, 357
Litter Size
Intrauterine infusion of killed semen to increase litter size in gilts, 187
Ovulation rate and litter size of Barbados, Targhee and crossbred ewes, 905
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555
Liver Diseases
Inositol and hepatic lipidosis.
I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693
Locomotion
Effect of cimaterol (CL 263,780) as a repartitioning agent in the diet for finishing pigs, 21
Luteinizing Hormone
Androgen and estradiol effects on gonadotropin secretion and response to GnRH in ovariectomized pony mares, 1654
Clearance rate of luteinizing hormone and follicle stimulating hormone from peripheral circulation in the pig, 1649
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the estrous cycle at treatment, 422
Effect of FSH treatment on LH and FSH receptors in chronic cystic-ovarian-diseased dairy cows, 1063
Effect of naloxone on serum luteinizing hormone, cortisol and prolactin concentrations in anestrous beef cows, 1340
Effects of pulsatile injection of GnRH into 6- to 14-wk-old Holstein bulls, 1332
Effects of restriction of dietary energy intake during the prepubertal period on secretion of luteinizing hormone and responsiveness of the pituitary to luteinizing hormone-releasing hormone in heifers, 1641
Elevation of serum testosterone during chronic LHRH agonist treatment in the bull, 199
Inability to predict sexual and aggressive behaviors by plasma concentrations of testosterone and luteinizing hormone in Hereford bulls, 613
Pulsatile or continuous infusion of luteinizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
Relationships among concentrations of four opioid neuropeptides and luteinizing hormone-releasing hormone in neural tissues of beef cows following early weaning, 723
Satellite cell proliferation in response to pituitary hormones, 1596
Temporal relationship of the pulsatile fluctuation of luteinizing hormone and progesterone in the bovine: A time series cross-correlation analysis, 191
Luteinizing Hormone-Releasing Hormone
Pulsatile or continuous infusion of lutenizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
Relationships among concentrations of four opioid neuropeptides and luteinizing hormone-releasing hormone in neural tissues of beef cows following early weaning, 723
Lymphocytes
Neonatal calf serum immunoregulation of lymphocyte blastogenic responses, 759
Lysine
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155

M

Magnesium
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396
Mali
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567

Masculinizing Effect
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Mastitis
Prevalence and effects of intramammary infection in beef cows, 16
Maternal Effects
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
Reciprocal cross effects on growth hormone and prolactin secretion in cattle: Influence of genotype and maternal environment, 1660
Meat
Acceptability of beef from Angus-Hereford or Angus-Hereford-Brahman steers finished on all-forage or a high-energy diet, 381
An immunological approach for prevention of boar odor in pork, 1279
Effects of anabolic implants and breed group on carcass traits and palatability characteristics of bullock beef, 399
Effects of endogenous and exogenous growth-promoting compounds on carcass composition, meat quality and meat nutritional value, 1441
Influence of animal diet and carcass electrical stimulation on the quality of meat from youthful ram lambs, 139
Responses of bovine muscle to restraint and electrical stimulation, 147
Steroid hormone pathways in the pig, with special emphasis on boar odor: A review, 632
Using postmortem technology to complement livestock production practices, 1449
Using restructuring technology to increase red meat value, 1458
Video image analysis prediction of total kilograms and percent primal lean and fat yield of beef carcasses, 1609
Membranes
Insulin binding to bovine mammary membranes: Comparison of microsomes versus smooth membranes, 179
Metabolism
Fate and residues of [4-^{14}C] estradiol-17β after intramuscular injection into Holstein steer calves, 681
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396
Potential nutritional strategies for intensively managed cattle during thermal stress, 543
Susceptibility to stress, postmortem muscle metabolism and meat quality of pigs after modification of the fluid volume of the vascular and extravascular spaces, 646
Vanadium metabolism in sheep.
III. Influence of dietary vanadium on kinetics of ^{48}V administered orally or intravenously and comparison of compartmental and graphic models, 804
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Methane Production
The effect of high dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
Methylhistidine
N$^{\tau}$-methylhistidine – Feed and duodenal content and ruminal degradation, 1713
Methylmalonyl-CoA Mutase
Vitamin B_{12} and monensin effects on performance, liver and serum vitamin B_{12} concentrations and activity of propionate metabolizing hepatic enzymes in feedlot lambs, 452
Mice
Efficiency of growth in mice with a major gene for rapid postweaning gain, 77
Miserotoxin
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072
Models
An update of a dynamic model of ruminant digestion, 1412
Development of a dynamic model of beef cattle growth and composition, 86
Evaluation of a model of beef cattle growth and composition, 98
Vanadium metabolism in sheep.
III. Influence of dietary vanadium on kinetics of ^{48}V administered orally or intravenously and comparison of compartment and graphic models, 804
Monensin
Administration of monensin in self-fed (salt limiting) dry supplements or on an alternate-day feeding schedule, 593
Effect of monensin on the performance of cattle on pasture or fed harvested forages in confinement, 583
Effects of dietary additives on B-vitamin production and absorption in steers, 484
Lasalocid toxicity in cattle: Acute clinicopathological changes, 1308
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
The effect of high dietary cation concentration on methanogenesis by steers fed diets with and without ionophores, 1737
Vitamin B_{12} and monensin effects on performance, liver and serum vitamin B_{12} concentrations and activity of propionate metabolizing hepatic enzymes in feedlot lambs, 452
[^{14}C] Monensin balance in bile-fistulated ponies, 173
Multiple Births
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895
Muscles
Effects of feeder-cattle frame size and muscle thickness on subsequent growth and carcass development.
I. An objective analysis of frame size and muscle thickness, 109
Influence of animal diet and carcass electrical stimulation on the quality of meat from youthful ram lambs, 139
Satellite cell proliferation in response to pituitary hormones, 1596
Skeletal muscle protein turnover in broiler and layer chicks, 1576

Susceptibility to stress, postmortem muscle metabolism and meat quality of pigs after modification of the fluid volume of the vascular and extravascular spaces, 646
Myoinositol
Inositol and hepatic lipidosis.
I. Effect of inositol supplementation and time from parturition on liver and serum lipids in dairy cattle, 1682
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693

N

Naloxone
Effect of naloxone on serum luteinizing hormone, cortisol and prolactin concentrations in anestrous beef cows, 1340
Nitrogen
Digestion and utilization of ammoniated grass-legume silage, 235
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
Effects of rumen-protected methionine and lysine on ruminant performance and nutrient metabolism, 1101
Enhanced nitrogen retention in yearling horses supplemented with yeast culture, 1635
Nitrogen utilization and digestibility by growing steers and goats of diets that contain monensin and low crude protein, 857
The effect of pre-fast diet and transport on nitrogen metabolism of calves, 1719
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813
Nutrition
A radiographic characterization of toe length disparity and its relation to nutrition and structural unsoundness in boars, barrows and sows, 1172
Administration of monensin in self-fed (salt limiting) dry supplements or on an alternate-day feeding schedule, 593
An update of a dynamic model of ruminant digestion, 1412
Digestion and utilization of ammoniated grass-legume silage, 235
Effect of varying levels of postpartum nutrition and body condition at calving on subsequent reproductive performance in beef cattle, 300
Effects of diet concentrate level and sodium bicarbonate on site and extent of forage fiber digestion in the gastrointestinal tract of wethers, 1388
Effects of forage particle size, level of feed intake and supplemental protein degradability on microbial protein synthesis and site of nutrient digestion in steers, 1081
Effects of restriction of dietary energy intake during the prepubertal period on secretion of luteinizing hormone and responsiveness of the pituitary to luteinizing hormone-releasing hormone in heifers, 1641
Management of transit-stress syndrome in cattle: Nutritional and environmental effects, 555
Nutritive value of high- and low-tannin grain sorghums harvested and stored in the high-moisture state for growing-finishing swine, 1290
Potential nutritional strategies for intensively managed cattle during thermal stress, 543
Threonine requirement of pigs weighing 5 to 15 kg, 1617
Use of injectable vitamin E and selenium-vitamin E emulsion in ewes and suckling lambs to prevent nutritional muscular dystrophy, 497

O

Obesity
Effects of obesity on insulin and glucose metabolism in cyclic heifers, 772
Opioids
Relationships among concentrations of four opioid neuropeptides and luteinizing hormone-releasing hormone in neural tissues of beef cows following early weaning, 723
Orchardgrass
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813
Organs
Growth, development and body composition in three genetic stocks of swine, 968
Ovaries
Anterior pituitary concentrations of gonadotropins, GnRH-receptors and ovarian characteristics following early weaning in beef cows, 717
Effect of FSH treatment on LH and FSH receptors in chronic cystic-ovarian-diseased dairy cows, 1063
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Ovarian follicular growth, function and turnover in cattle: A review, 428
Ovulation
Effect of boar presence before and after weaning on estrus and ovulation in sows, 9
Ovulation rate and litter size of Barbados, Targhee and crossbred ewes, 905
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555

P

Palatability
Effects of anabolic implants and breed group on carcass traits and palatability characteristics of bullock beef, 399
Evaluation of growth, carcass traits and reproductive organs of young boars in response to zeranol implantation, 1164
Implanting young bulls with zeranol from birth to four slaughter ages:
II. Carcass quality, palatability and muscle-collagen characteristics, 388
Parasympathomimetics
Effects of slaframine on ruminant digestive function: Resting salivary flow and composition in cattle, 1404
Particle Size
Effects of forage particle size, level of feed intake and supplemental protein degradability on microbial protein synthesis and site of nutrient digestion in steers, 1081
Patterns
Twenty-four-hour growth hormone profiles in Angus steers, 1267
Peanuts
Digestibility and feeding value of peanut hulls for swine, 412
Influence of dietary crude protein on peanut skin digestibility and utilization by feedlot steers, 887
Performance
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
Effect of cimaterol (CL 263,780) as a repartitioning agent in the diet for finishing pigs, 21
Effect of diet and exercise on performance, carcass traits and plasma components of growing-finishing barrows, 665
Effect of space allowance and tylosin feeding on performance of growing-finishing pigs, 871
Effects of rumen-protected methionine and lysine on ruminant performance and nutrient metabolism, 1101
Feedlot performance and tissue residues of cattle consuming diets containing aflatoxins, 691
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Relationships among serum characteristics, performance and carcass traits in growing pigs, 1675
Vitamin B_{12} and monensin effects on performance, liver and serum vitamin B_{12} concentrations and activity of propionate metabolizing hepatic enzymes in feedlot lambs, 452
Pharmacology
Behavioral, physiological and functional aspects of stereotyped behavior: A review and a reinterpretation, 1776
Phosphorus
Biological characteristics for assessing low phosphorus intake in finishing swine, 163
Photoperiod
Response of body weight and clearance and secretion rates of growth hormone to photoperiod in Holstein heifers, 1273
Serum concentrations of prolactin, throxine and triiodothyronine relative to season and the estrous cycle in the mare, 1012
Pigs
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
A radiographic characterization of toe length disparity and its relation to nutrition and structural unsoundness in boars, barrows and sows, 1172
A survey of productivity and its component interrelationships in Canadian swine herds, 576
An immunological approach for prevention of boar odor in pork, 1279
Biological characteristics for assessing low phosphorus intake in finishing swine, 163
Body condition of sows across parities and relationship to reproductive performance, 1187
Body weight, total body water and hematocrit in diarrheic piglets, 307
Clearance rate of luteinizing hormone and follicle stimulating hormone from peripheral circulation in the pig, 1649
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Digestibility and feeding value of peanut hulls for swine, 412
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155
Effect of boar presence before and after weaning on estrus and ovulation in sows, 9
Effect of cimaterol (CL 263,780) as a repartitioning agent in the diet for finishing pigs, 21
Effect of feed and(or) water deprivation prior to weaning on reproductive performance of sows: A cooperative study, 1
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Effect of space allowance and tylosin feeding on performance of growing-finishing pigs, 871
Effect of streptozotocin-induced diabetes in primiparous swine on subsequent reproductive performance, 1005
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
Effects of age, weaning and diet on digestive enzyme levels in the piglet, 1298
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Evaluation of growth, carcass traits and reproductive organs of young boars in response to zeranol implantation, 1164
Excess supplemental choline for swine, 992
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Genetic correlation between boars, barrows and

gilts for various carcass traits, 618
Growth, development and body composition in three genetic stocks of swine, 968
Ileal cannulation in baby pigs with a simple T-cannula, 407
Intrauterine infusion of killed semen to increase litter size in gilts, 187
Mass selection in a pig population: Correlated changes in carcass merit, 1546
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Mass selection in a pig population: Experimental design and responses to direct selection for rapid growth and minimum fat, 1492
Mass selection in a pig population: Realized heritabilities, 1509
Nutritive value of high- and low-tannin grain sorghums harvested and stored in the high-moisture state for growing-finishing swine, 1290
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
Relationships among serum characteristics, performance and carcass traits in growing pigs, 1675
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706
Steroid hormone pathways in the pig, with special emphasis on boar odor: A review, 632
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584
Susceptibility to stress, postmortem muscle metabolism and meat quality of pigs after modification of the fluid volume of the vascular and extravascular spaces, 646
The effect of confinement on days to puberty in gilts, 1203
The effect of duration of boar exposure on the frequency of gilts reaching first estrus, 1210
The effect of meal intervals and weaning on feed intake of early weaned pigs, 1233
The effects of a dietary antimicrobial on the biological half-life of chenodeoxycholic acid and plasma bile acid concentration patterns in the young pig, 997
Threonine requirement of pigs weighing 5 to 15 kg, 1617
Tryptophan requirement of growing swine as determined by the oxidation of an indicator amino acid, 660
Variables in estimation of adipocyte size and number with a particle counter, 980

Pituitary
Anterior pituitary concentrations of gonadotropins, GnRH-receptors and ovarian characteristics following early weaning in beef cows, 717
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021

Placenta
Fetal growth of beef calves.
II. Effect of sire on prenatal development of the calf and related placental characteristics, 1375

Poisonous Plants
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072

Polysaccharides
Postprandial trends in estimated rumen digesta polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789

Postpartum Interval
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021
Effect of varying levels of postpartum nutrition and body condition at calving on subsequent reproductive performance in beef cattle, 300
Factors affecting the relationship between calving interval of cows and weaning weights of calves, 1194

Potassium
The effect of a preassembly implant and post-transit diet on the health performance and metabolic profile of feeder calves, 27

Pregnancy
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Effect of streptozotocin-induced diabetes in primiparous swine on subsequent reproductive performance, 1005
Effect of varying levels of postpartum nutrition and body condition at calving on subsequent reproductive performance in beef cattle, 300
Fetal growth of beef calves.
I. Effect of prepartum dietary crude protein on birth weight, blood metabolites and steroid hormone concentrations, 1363
Fetal growth of beef calves.
II. Effect of sire on prenatal development of the calf and related placental characteristics, 1375
Temporal relationship of the pulsatile fluctuation of luteinizing hormone and progesterone in the bovine: A time series cross-correlation analysis, 191

Preweaning Weight
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Prevalence and effects of intramammary infection in beef cows, 16
Sire effect and repeatability of beef cow productivity, 1255

Productivity
A survey of productivity and its component interrelationships in Canadian swine herds, 576
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567

Progesterone
Anovulation in postpartum suckled beef cows.
I. Associations among size and numbers of ovarian follicles, uterine involution, and hormones in serum and follicular fluid, 734
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the

estrous cycle at treatment, 422
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Pulsatile or continuous infusion of luteinizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
Response of fall-born calves to progesterone-estradiol benzoate implants and reimplants, 37
Temporal relationship of the pulsatile fluctuation of luteinizing hormone and progesterone in the bovine: A time series cross-correlation analysis, 191
Prolactin
Effect of number of conceptuses on maternal hormonal concentrations in the pig, 1666
Effect of naloxone on serum luteinizing hormone, cortisol and prolactin concentrations in anestrous beef cows, 1340
Reciprocal cross effects on growth hormone and prolactin secretion in cattle: Influence of genotype and maternal environment, 1660
Satellite cell proliferation in response to pituitary hormones, 1596
Serum concentrations of prolactin, thyroxine and triiodothyronine relative to season and the estrous cycle in the mare, 1012
Prostaglandins
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the estrous cycle at treatment, 422
Endocrine profiles associated with life span of induced corpora lutea in postpartum beef cows, 1353
Evaluation of prostaglandin E_2 as a regulator of lipolysis in bovine adipose tissue, 363
Protein
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Effects of forage particle size, level of feed intake and supplemental protein degradability on microbial protein synthesis and site of nutrient digestion in steers, 1081
Fetal growth of beef calves.
I. Effect of prepartum dietary crude protein on birth weight, blood metabolites and steroid hormone concentrations, 1363
Impact of niacin and length of incubation on protein synthesis, soluble to total protein ratio and fermentative activity of ruminal microorganisms, 244
Influence of level of feeding and nutrient content of the concentrate on growth and development of yearling horses, 290
Protein degradation by rumen microbes of heat-treated whole cottonseed, 1732
Ruminal and post-ruminal utilization of nitrogen and starch from sorghum grain-, corn- and barley-based diets by beef steers, 521
Skeletal muscle protein turnover in broiler and layer chicks, 1576
The effect of a preassembly implant and post-transit diet on the health performance and metabolic profile of feeder calves, 27
The effect of heat treatment of whole cottonseed on site and extent of protein digestion in dairy cows, 1423
The effects of diet and remating interval after parturition on the reproductive performance of the commercial doe rabbit, 1624
The influence of diet and protozoal numbers on the breakdown and synthesis of protein in the rumen of sheep, 509
Protozoa
The influence of diet and protozoal numbers on the breakdown and synthesis of protein in the rumen of sheep, 509
Puberty
Effects of pulsatile injection of GnRH into 6- to 14-wk-old Holstein bulls, 1332
Effects of restriction of dietary energy intake during the prepubertal period on secretion of luteinizing hormone and responsiveness of the pituitary to luteinizing hormone-releasing hormone in heifers, 1641
Follicular fluid concentrations of estradiol-17β and progesterone and secretory patterns of LH and FSH in prepubertal gilts reared in confinement or outdoor lots, 751
Pulsatile or continuous infusion of luteinizing hormone-releasing hormone and hormonal concentrations in prepubertal beef heifers, 1034
The effect of confinement on days to puberty in gilts, 1203
The effect of duration of boar exposure on the frequency of gilts reaching first estrus, 1210
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875

Q

Quadratic Programming
Using net energy for gain and maintenance in a quadratic equation to calculate beef cattle diets, 1095

R

Rabbits
The effects of diet and remating interval after parturition on the reproductive performance of the commercial doe rabbit, 1624
Radiography
A radiographic characterization of toe length disparity and its relation to nutrition and structural unsoundness in boars, barrows and sows, 1172
Rats
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Receptors
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells,

and concentrations of steroids in various sized ovarian follicles, 742
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021
Effect of FSH treatment on LH and FSH receptors in chronic cystic-ovarian-diseased dairy cows, 1063
Red Clover
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813
Relationships
Including pedigree relationships in beef sire evaluation, 1563
Repartitioning Agents
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Repeatability
Estimation of repeatability of blood constituents in gestating beef cattle on protein- and energy-restricted diets, 1049
Sire effect and repeatability of beef cow productivity, 1255
Variables in estimation of adipocyte size and number with a particle counter, 980
Reproduction
Anovulation in postpartum suckled beef cows.
I. Associations among size and numbers of ovarian follicles, uterine involution, and hormones in serum and follicular fluid, 734
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells, and concentrations of steroids in various sized ovarian follicles, 742
Body condition of sows across parities and relationship to reproductive performance, 1187
Clearance rate of luteinizing hormone and follicle stimulating hormone from peripheral circulation in the pig, 1649
Effect of boar presence before and after weaning on estrus and ovulation in sows, 9
Effect of controlled exercise on libido in 2-yr-old stallions, 1220
Effect of feed and(or) water deprivation prior to weaning on reproductive performance of sows: A cooperative study, 1
Effect of streptozotocin-induced diabetes in primiparous swine on subsequent reproductive performance, 1005
Effects of adding fat to the sow lactation diet on sow lactation and rebreeding performance, 672
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Effects of intermittent injections of LHRH on secretory patterns of LH and FSH and ovarian follicular growth during postpartum anovulation in suckled beef cows, 1317
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Effects of pulsatile injection of GnRH into 6- to 14-wk-old Holstein bulls, 1332
Evaluation of growth, carcass traits and reproductive organs of young boars in response to zeranol implantation, 1164
Factors affecting the relationship between calving interval of cows and weaning weights of calves, 1194
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895
Influence of body weight and number of inseminations on fertility of progestogen-treated ewe lambs raised in controlled environments, 1058
Intrauterine infusion of killed semen to increase litter size in gilts, 187
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Ovarian follicular growth, function and turnover in cattle: A review, 428
Scrotal circumference in yearling Hereford bulls: Adjustments factors, heritabilities and genetic, environmental and phenotypic relationships with growth traits, 958
The effect of confinement on days to puberty in gilts, 1203
The effect of duration of boar exposure on the frequency of gilts reaching first estrus, 1210
The effects of diet and remating interval after parturition on the reproductive performance of the commercial doe rabbit, 1624
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875
Residues
Fate and residues of [4-^{14}C] estradiol-17β after intramuscular injection into Holstein steer calves, 681
Feedlot performance and tissue residues of cattle consuming diets containing aflatoxins, 691
Restraint
Electro-immobilization versus mechanical restraint in an avoid-avoid choice test for ewes, 1469
Responses of bovine muscle to restraint and electrical stimulation, 147
Retention
Dynamics of digestion in cattle, sheep, goats and deer, 208
Romanov
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555
Rumen
Effect of intake and forage level on ruminal turnover rates, bacterial protein synthesis and duodenal amino acid flows in sheep, 216
Effect of supplemental sodium bicarbonate on nutrient digestibilities and rumen pH measured continuously, 226
Effects of diet concentrate level and sodium bicarbonate on site and extent of forage fiber digestion in the gastrointestinal tract of wethers, 1388
N^{τ}-methylhistidine – Feed and duodenal content and ruminal degradation, 1713
Postprandial trends in estimated rumen digesta

polysaccharides and their relation to changes in bacterial groups and rumen fluid characteristics, 789
Protein degradation by rumen microbes of heat-treated whole cottonseed, 1732
Ruminal evacuation's effect on microbial activity and ruminal function, 783
The influence of diet and protozoal numbers on the breakdown and synthesis of protein in the rumen of sheep, 509
Rumen Microorganisms
Effects of two dietary niacin concentrations on ruminal fluid free niacin concentration, and of supplemental niacin and source of inoculum on in vitro microbiol growth, fermentative activity and nicotinamide adenine dinucleotide pool size, 254
Enhanced degradation of 3-nitropropanol by ruminal microorganisms, 1072
Impact of niacin and length of incubation on protein synthesis, soluble to total protein ratio and fermentative activity of ruminal microorganisms, 244
Ruminal evacuation's effect on microbial activity and ruminal function, 783
Ruminants
An update of a dynamic model of ruminant digestion, 1412
Digestion and utilization of ammoniated grass-legume silage, 235
Dynamics of digestion in cattle, sheep, goats and deer, 208
Effects of rumen-protected methionine and lysine on ruminant performance and nutrient metabolism, 1101
N^{τ}-methylhistidine – Feed and duodenal content and ruminal degradation, 1713

S

Salivary Secretions
Effects of slaframine on ruminant digestive function: Resting salivary flow and composition in cattle, 1404
Salt
Administration of monensin in self-fed (salt limiting) dry supplements or on an alternate-day feeding schedule, 593
Sample Storage
Variables in estimation of adipocyte size and number with a particle counter, 980
Scrotum
Scrotal circumference in yearling Hereford bulls: Adjustment factors, heritabilities and genetic, environmental and phenotypic relationships with growth traits, 958
Selection
A genetic analysis of feed conversion efficiency and associated traits in swine, 910
Body temperature in beef cattle: Its control and relevance to production in the tropics, 531
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
I. Measurement of selection applied, 54
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
II. Evaluation of response, 66
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895
Genetic correlation between boars, barrows, and gilts for various carcass traits, 618
Mass selection in a pig population: Correlated changes in carcass merit, 1546
Mass selection in a pig population: Correlated responses in preweaning growth, 1533
Mass selection in a pig population: Correlated responses in reproductive performance, 1523
Mass selection in a pig population: Experimental design and responses to direct selection for rapid growth and minimum fat, 1492
Mass selection in a pig population: Realized heritabilities, 1509
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
Selection in Hereford cattle.
I. Selection intensity, generation interval and indexes in retrospect, 927
Selection in Hereford cattle.
II. Expected and realized response, 937
Selenium
Use of injectable vitamin E and selenium-vitamin E emulsion in ewes and suckling lambs to prevent nutritional muscular dystrophy, 497
Semiarid Climates
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567
Sex Effects
Genetic correlation between boars, barrows and gilts for various carcass traits, 618
Performance of Duroc and Yorkshire boars and gilts and reciprocal breed crosses, 918
Sheep
Changes in the concentration of hypothalamic and hypophyseal receptors for estradiol in pregnant and postpartum ewes, 1021
Concentrations of ovarian and pituitary hormones following prostaglandin $F_2\alpha$-induced luteal regression in ewes varies with the day of the estrous cycle at treatment, 422
Effect of intake and forage level on ruminal turnover rates, bacterial protein synthesis and duodenal amino acid flows in sheep, 216
Effects of cimaterol and fishmeal on performance, carcass characteristics and skeletal muscle growth in lambs, 370
Electro-immobilization versus mechanical restraint in an avoid-avoid choice test for ewes, 1469
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895
Influence of animal diet and carcass electrical stimulation on the quality of meat from youthful ram lambs, 139
Influence of body weight and number of inseminations on fertility of progestogen-treated ewe lambs raised in controlled environments, 1058
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567

Ovulation rate and litter size of Barbados, Targhee and crossbred ewes, 905
Reproductive parameters of crossbred ewe lambs sired by Romanov, Finnish Landrace, Dorset and Western range rams, 1555
Sources of variation in wool fiber diameter, 1181
The influence of diet and protozoal numbers on the breakdown and synthesis of protein in the rumen of sheep, 509
Use of injectable vitamin E and selenium-vitamin E emulsion in ewes and suckling lambs to prevent nutritional muscular dystrophy, 497
Vanadium metabolism in sheep.
III. Influence of dietary vanadium on kinetics of ^{48}V administered orally or intravenously and comparison of compartmental and graphic models, 804
Vitamin B_{12} and monensin effects on performance, liver and serum vitamin B_{12} concentrations and activity of propionate metabolizing hepatic enzymes in feedlot lambs, 452
Yield, chemical composition and digestibility by sheep of orchardgrass fertilized with different rates of nitrogen and sulphur or associated red clover, 813

Sires
Fetal growth of beef calves.
II. Effect of sire on prenatal development of the calf and related placental characteristics, 1375
Heterosis levels from matings utilizing crossbred sires, 47
Including pedigree relationships in beef sire evaluation, 1563

Size
Economic effects of alternative beef cow size and milking potential in cow-calf operations, 1154

Slaughter
Characterization of cattle of a five-breed diallel:
VI. Fat deposition patterns of serially slaughtered bulls, 1259

Sodium Bicarbonate
Effect of supplemental sodium bicarbonate on nutrient digestibilities and rumen pH measured continuously, 226

Soil Ingestion
Influence of ingestion of aluminum, citric acid and soil on mineral metabolism of lactating beef cows, 1396

Somatotropin
Reciprocal cross effects on growth hormone and prolactin secretion in cattle: Influence of genotype and maternal environment, 1660
Response of body weight and clearance and secretion rates of growth hormone to photoperiod in Holstein heifers, 1273
Satellite cell proliferation in response to pituitary hormones, 1596
Stimulation of lipogenesis by insulin in swine adipose tissue: Antagonism by porcine growth hormone, 1584
Twenty-four-hour growth hormone profiles in Angus steers, 1267

Sorghum
Nutritive value of high- and low-tannin grain sorghums harvested and stored in the high-moisture state for growing-finishing swine, 1290

Space Requirements
Effect of space allowance and tylosin feeding on performance of growing-finishing pigs, 871

Specific Heat
Body weight, total body water and hematocrit in diarrheic piglets, 307

Sperm
In vivo capacitation and acrosome reaction of bovine sperm in estrous and diestrous cows, 1029

Starch
Ruminal and post-ruminal utilization of nitrogen and starch from sorghum grain-, corn- and barley-based diets by beef steers, 521

Steroids
An immunological approach for prevention of boar odor in pork, 1279
Anovulation in postpartum suckled beef cows.
II. Associations among binding of ^{125}I-labeled gonadotropins to granulosa and thecal cells, and concentrations of steroids in various sized ovarian follicles, 742
Effects of intermittent injections of LHRH on specific binding of ^{125}I-labeled gonadotropins to granulosa and theca, and concentrations of steroids in serum and ovarian follicles during postpartum anovulation in suckled beef cows, 1324
Effects of obesity on insulin and glucose metabolism in cyclic heifers, 772
Ovarian follicular growth, function and turnover in cattle: A review, 428
Steroid hormone pathways in the pig, with special emphasis on boar odor: A review, 632

Streptozotocin
Effect of streptozotocin-induced diabetes in primiparous swine on subsequent reproductive performance, 1005

Stress
Behavioral, physiological and functional aspects of stereotyped behavior: A review and a reinterpretation, 1776
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
Management of transit-stress syndrome in cattle: Nutritional and environmental effects, 555
Potential nutritional strategies for intensively managed cattle during thermal stress, 543
Susceptibility to stress, postmortem muscle metabolism and meat quality of pigs after modification of the fluid volume of the vascular and extravascular spaces, 646
The effect of pre-fast diet and transport on nitrogen metabolism of calves, 1719
The effects of two shipping treatments on the carcass characteristics of bulls implanted with zeranol and unimplanted steers, 1602

Suppression
Neonatal calf serum immunoregulation of lymphocyte blastogenic responses, 759

Survival

Birth weight, dystocia and calf mortality in some New Zealand beef breeding herds, 327
Effects of dietary alfalfa-orchardgrass hay and lasalocid on sow reproductive performance, 1145
Effects of oral doses of corn oil and other factors on preweaning survival and growth of piglets, 601
Fertility, embryo survival and litter size in lines of Targhee sheep selected for weaning weight or litter size, 895

T

Tannins
Influence of dietary crude protein on peanut skin digestibility and utilization by feedlot steers, 887
Nutritive value of high- and low-tannin grain sorghums harvested and stored in the high-moisture state for growing-finishing swine, 1290
Temperature
Body temperature in beef cattle: Its control and relevance to production in the tropics, 531
Cold resistance and environmental temperature preference in diarrheic piglets, 315
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
The effect of environmental temperature on concentrations of thyroxine and triiodothyronine after thyrotropin releasing hormone in steers, 1346
Winter grazing activity and forage intake of range cows in the Northern Great Plains, 1240
Testosterone
Elevation of serum testosterone during chronic LHRH agonist treatment in the bull, 199
Inability to predict sexual and aggressive behaviors by plasma concentrations of testosterone and luteinizing hormone in Hereford bulls, 613
Thermoregulation
Body temperature in beef cattle: Its control and relevance to production in the tropics, 531
Heat production of cattle acclimated to cold, thermoneutrality and heat when exposed to thermoneutrality and heat stress, 1434
Thyroid Hormones
Effects of obesity on insulin and glucose metabolism in cyclic heifers, 772
Inositol and hepatic lipidosis.
II. Effect of inositol supplementation and time from parturition on serum insulin, thyroxine and triiodothyronine and their relationship to serum and liver lipids in dairy cows, 1693
Satellite cell proliferation in response to pituitary hormones, 1596
Serum concentrations of prolactin, thyroxine and triiodothyronine relative to season and the estrous cycle in the mare, 1012
The effect of environmental temperature on concentrations of thyroxine and triiodothyronine after thyrotropin releasing hormone in steers, 1346
Toxicity
Lasalocid toxicity in cattle: Acute clinicopathological changes, 1308
Traditional Farming
Livestock production in central Mali: Economic characters and productivity indices for traditionally managed goats and sheep, 567
Transit Time
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
I. High-concentrate diets, 830
Effects of dietary nitrogen level and ileal antibiotic administration on digestion and passage rate in beef heifers.
II. High-forage diets, 844
Transmission
[^{14}C]-Aflatoxin B_1 metabolism in lactating goats and rats, 697
Transport
The effect of a preassembly implant and post-transit diet on the health performance and metabolic profile of feeder calves, 27
The effect of pre-fast diet and transport on nitrogen metabolism of calves, 1719
Turnover
Dynamics of digestion in cattle, sheep, goats and deer, 208
Tylosin
Effect of space allowance and tylosin feeding on performance of growing-finishing pigs, 871

U

Urea
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Enhanced nitrogen retention in yearling horses supplemented with yeast culture, 1635
Influence of dietary crude protein on peanut skin digestibility and utilization by feedlot steers, 887
Uteroferrin
Role of uteroferrin in placental iron transport in swine: Relationship between uteroferrin levels and iron deposition in the conceptus during gestation, 706
Uterus
Anovulation in postpartum suckled beef cows.
I. Associations among size and numbers of ovarian follicles, uterine inovulation, and hormones in serum and follicular fluid, 734

V

Vanadium
Vanadium metabolism in sheep.
III. Influence of dietary vanadium on kinetics of ^{48}V administered orally or intravenously and comparison of compartmental and graphic models, 804
Variance Components

Estimation of repeatability of blood constituents in gestating beef cattle on protein- and energy-restricted diets, 1049
Vitamins
Effect of biotin and(or) lysine additions to corn-soybean meal diets on the performance and nutrient balance of growing pigs, 155
Effects of dietary additives on B-vitamin production and absorption in steers, 484
Effects of grain source and concentrate level on B-vitamin production and absorption in steers, 473
Effects of two dietary niacin concentrations on ruminal fluid free niacin concentration, and of supplemental niacin and source of inoculum on in vitro microbial growth, fermentative activity and nicotinamide adenine dinucleotide pool size, 254
Excess supplemental choline for swine, 992
Impact of niacin and length of incubation on protein synthesis, soluble to total protein ratio and fermentative activity of ruminal microorganisms, 244
Use of injectable vitamin E and selenium-vitamin E emulsion in ewes and suckling lambs to prevent nutritional muscular dystrophy, 497
Vitamin B_{12} and monesin effects on performance, liver and serum vitamin B_{12} concentrations and activity of propionate metabolizing hepatic enzymes in feedlot lambs, 452

W

Water
Body temperature in beef cattle: Its control and relevance to production in the tropics, 531
Body weight, total body water and hematocrit in diarrheic piglets, 307
Effect of feed and(or) water deprivation prior to weaning on reproductive performance of sows: A cooperative study, 1
Weaning
Anterior pituitary concentrations of gonadotropins, GnRH-receptors and ovarian characteristics following early weaning in beef cows, 717
Effects of age, weaning and diet on digestive enzyme levels in the piglet, 1298
Relationships among concentrations of four opioid neuropeptides and luteinizing hormone-releasing hormone in neural tissues of beef cows following early weaning, 723
The effect of meal intervals and weaning on feed intake of early weaned pigs, 1233
Weaning Weight
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
I. Measurement of selection applied, 54
Direct and correlated responses to selection for increased weaning or yearling weight in Angus cattle.
II. Evaluation of response, 66
Factors affecting the relationship between calving interval of cows and weaning weights of calves, 1194
Wheat
Adaptation of stocker calves to non-protein nitrogen diets as the result of grazing wheat forage, 464
Low-quality roughages for steers grazing wheat pasture,
II. Effect of wheat forage intake and utilization, 1113
Wool
Sources of variation in wool fiber diameter, 1181

Y

Yeast
Enhanced nitrogen retention in yearling horses supplemented with yeast culture, 1635

Z

Zeranol
Effects of zeranol implantation and late castration on sexual, agonistic and handling behavior in male feedlot cattle, 1224
Evaluation of growth, carcass traits and reproductive organs of young boars in response to zeranol implantation, 1164
Growth, carcass and palatability traits of intact males and steers implanted with zeranol or estradiol early and throughout life, 625
Implanting young bulls with zeranol from birth to four slaughter ages:
I. Live measurements, behavior, masculinity and carcass characteristics, 279
Implanting young bulls with zeranol from birth to four slaughter ages:
II. Carcass quality, palatability and muscle-collagen characteristics, 388
The effect of a preassembly implant and post-transit diet on the health performance and metabolic profile of feeder calves, 27
The effects of two shipping treatments on the carcass characteristics of bulls implanted with zeranol and unimplanted steers, 1602
Time of zeranol implantation on growth, reproduction and calving of beef heifers, 875
